

HOME DESIGN PLAN · SAMPLE · LINDA'S HOME

Your Home, Made New

The walls come down, and your kitchen, dining room and the old bedroom become one bright, warm room. Plus a calm living room and two new bathrooms — all in cream, mocha and brown.

A real home and the real plan we made for it.

The family's names are changed for privacy.

Kitchen Plan A · 4 color ideas

Dining 4 ideas for your table (+ an island?)

Living 4 ideas · where the TV goes

Baths 4 + 4 ideas · both different

Extras lights, curtains, colors, 2D plans

Open your new kitchen +
dining room in our free 2D
planner

Everything you asked for

We read every e-mail and every photo Linda sent. Here is her list — each line is answered on the page shown. *(A sample: a real home and the real plan we made for it, the family's names changed for privacy.)*

- ✓ Open the bedroom wall, bigger kitchen entrance · p.3–4
- ✓ A place for every appliance (+ washing machine) · p.5
- ✓ Practical cabinet insides · p.7
- ✓ Keep your dining table, and place it · p.8–9
- ✓ Cognac faux-leather sofa that is safe with the dog · p.11–12
- ✓ Remove the lamp + picture by the aquarium · p.12
- ✓ Guest bath: 3'3½" shower, 60" mocha vanity, two different walls · p.13–14
- ✓ Both bathrooms cream + brown, but different · p.13–16
- ✓ Curtains for every window (3–5 ideas each) · p.18–21
- ✓ Everything flows: kitchen ↔ dining ↔ living · p.22
- ✓ Kitchen Plan A in mocha, beige and brown · p.5–7
- ✓ No glass cabinets, no shelves of ornaments · p.6, 11
- ✓ The filtered-water dispenser and the sandwich maker · p.5
- ✓ Can an island fit? With a special top · p.9
- ✓ Where to put the TV + fill the 5'3" × 3'11½" hole · p.11–12
- ✓ Few pieces of furniture, open space · every page
- ✓ Owners' bath: 32 × 32 in shower, 28½" brown cabinet, walls + window · p.15–16
- ✓ Lamps and wall colors for every room · p.10, 17, 22
- ✓ Same cream floor in kitchen, dining and living · every render

One palette for the whole home

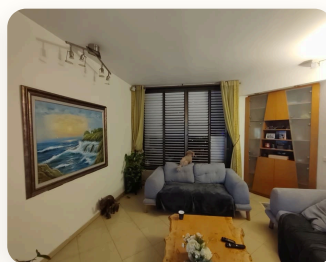

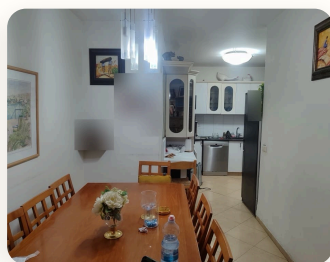

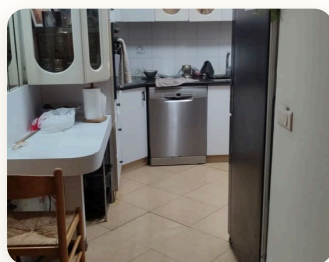

The same few colors repeat in every room, so the kitchen, the dining room and the living room feel like one home.

How to read this plan

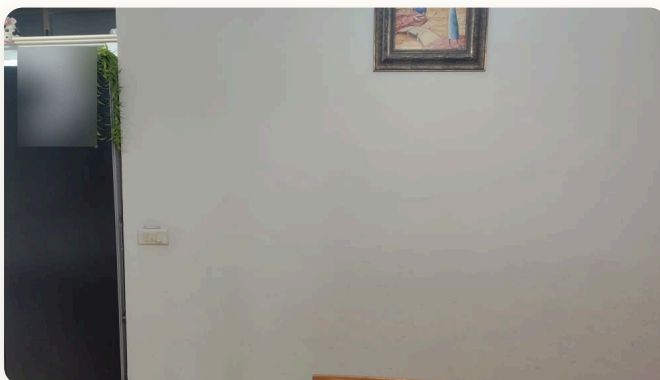

- ✓ Every room has **3–5 ideas**. The one with a gold frame is **our pick** — but every idea works.
- ✓ The pictures are your **own rooms**, made new with AI. Same walls, same windows, new look.
- ✓ Paint colors have a real **name and code** (SW = Sherwin-Williams, BM = Benjamin Moore). Any paint shop can mix them.
- ✓ Each room is also a **free 2D plan** you can open on your phone and change (page 23).

Your home today — the photos we worked from

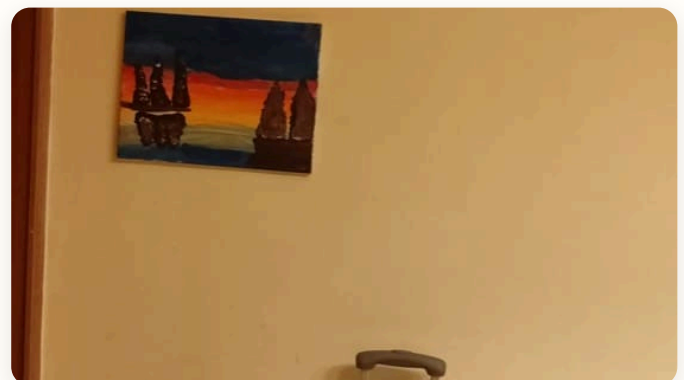

Two walls come down — in one straight line

Today the dining room and the spare bedroom are two rooms. **Wall R** between them comes down, and so does the **wooden wall behind the fridge** on the same line (the wall you marked on your photo). The kitchen opens **8'7½"** wide and you get **one big dining room**.

This wall comes down — from the dining room. The fridge is at its left end.

The same wall from inside the spare bedroom (the sunset painting).

"N*" on the plans is just the side with the kitchen sink wall, not the real north. Sizes come from your sketches; the rooms off the hall are approximate.

Your new open dining room

Stand at the end of the dining room and look toward the kitchen...

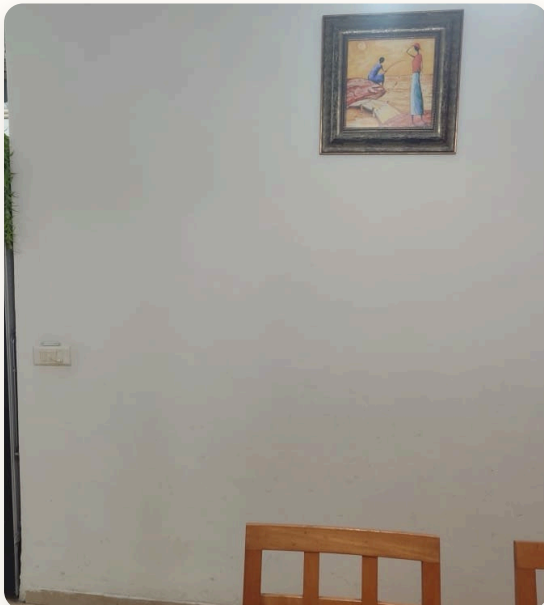

Before

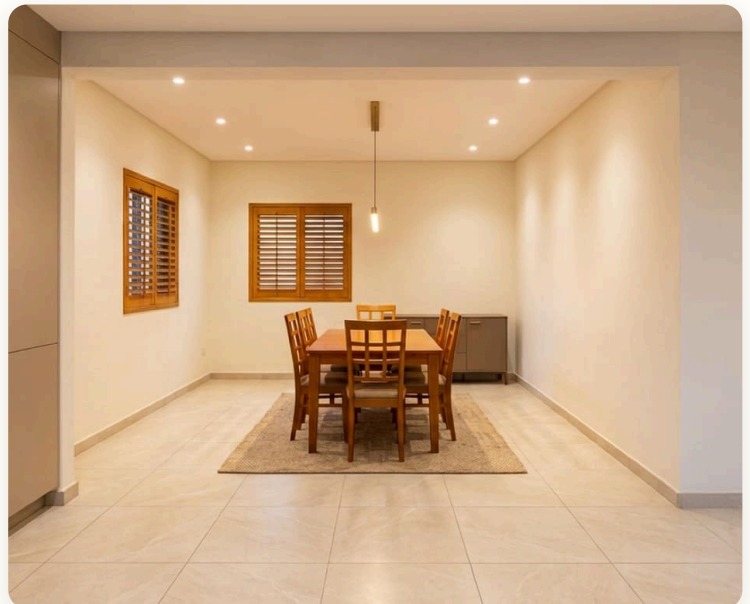

After — the kitchen (Plan A) straight ahead; on the right, the old bedroom is part of the room — your table by its window, the wall only about 3'3½" past the kitchen opening. The kitchen keeps its one window, above the sink.

...and now stand in the dining room and look at the wall that comes down.

Before

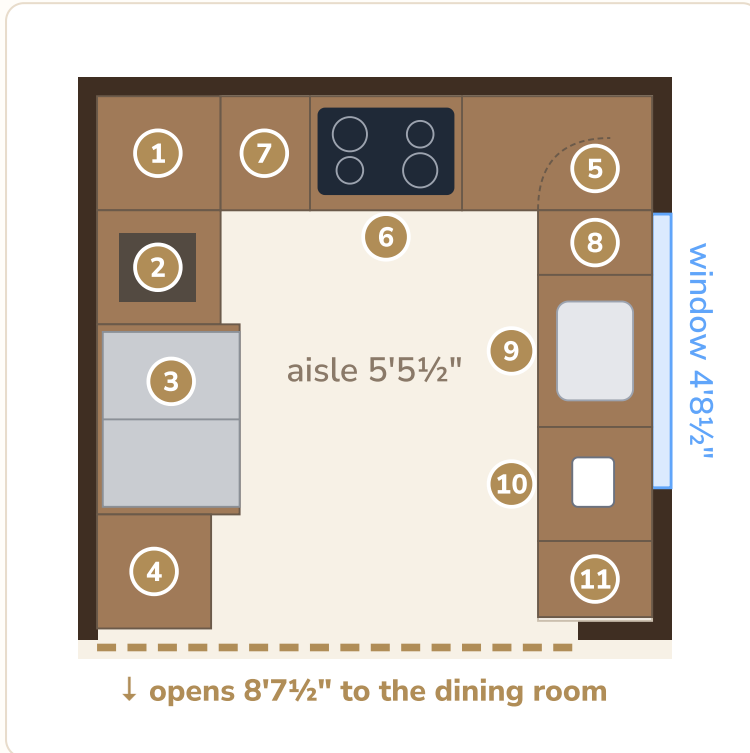

After — no wall. Behind it is the old spare bedroom (not the kitchen): its two windows and your table in the middle.

Pictures made with AI from your own photos. They show the mood, the colors and the layout — not exact building details.

Plan A — the kitchen you chose

Same layout you loved. Two small changes: every door is solid now, and the filtered-water dispenser gets its own spot next to the sink.

- 1 Tall pantry with 5 pull-out baskets
- 2 Oven at waist height, microwave above it
- 3 Your side-by-side fridge in a 39½" niche
- 4 Coffee & tea station: kettle, coffee maker, sandwich maker
- 5 Corner cabinet with a swing-out shelf
- 6 Cooktop over 3 deep pot drawers, hood above
- 7 Drawers for cutlery, spices, foil
- 8 Pull-out for oil and bottles
- 9 Sink under the window, recycling bins below
- 10 Dishwasher — the filtered-water dispenser on the counter above it
- 11 Tall cabinet with a solid door (no glass)

Appliance	Where	Good to know
Fridge (side-by-side)	Tall wall, niche 3	Niche 39½" wide. Leave about 2" of air behind and above it.
Oven + microwave	Tall wall, 2	Built in, like you wanted. Oven bottom at ~35½" — no bending.
Cooktop + hood	Back wall, 6	Induction is safest and easiest to clean. Hood at least as wide as the cooktop.
Dishwasher	Right of the sink, 10	Shares the sink's water and drain. Hidden behind a cabinet door.
Filtered-water dispenser	On the counter above 10	It needs the cold-water line under the sink (right next door) and one outlet.
Kettle, coffee maker, sandwich maker	Station 4	Two outlets (one on a timer), a light above.
Washing machine + dryer	Not in the kitchen	They stay where they are: stacked in the laundry nook past the guest bathroom. The kitchen keeps all its space for cabinets.

Mocha, beige and brown — 4 ways

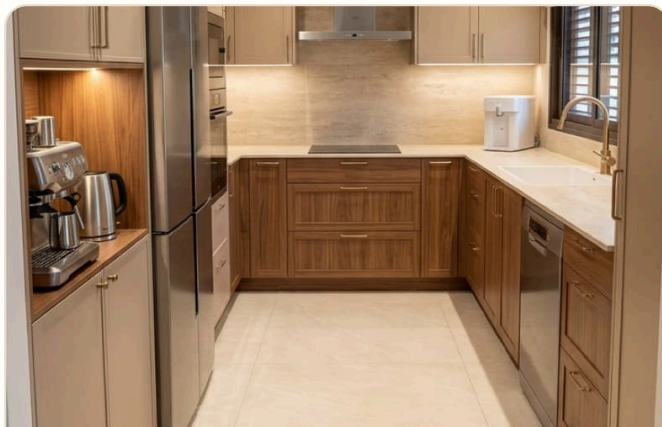

Same Plan A every time. Only the colors change. All four are warm and not too dark, like you asked.

1 · Mocha & Cream ★ Our pick

Warm mocha wood below and on the tall wall, soft cream above. Cozy and timeless.

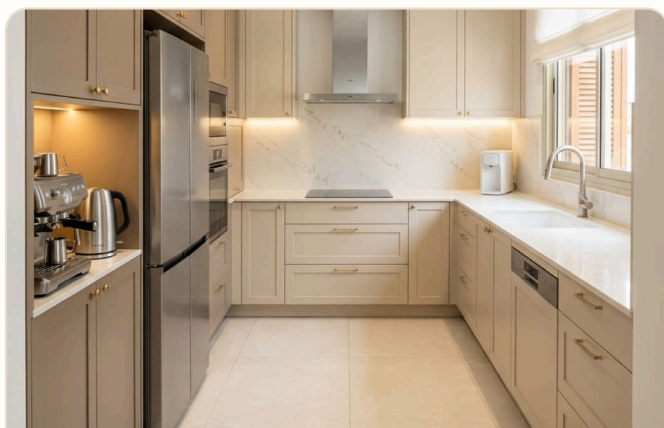

- Lower + tall** Mocha oak veneer
- Upper cabinets** SW 7012 Creamy
- Counter** Warm-white quartz, beige-gold veins
- Handles** Brushed brass

2 · Latte & Walnut

Walnut wood below, latte beige above, a stone-look wall behind the cooktop.

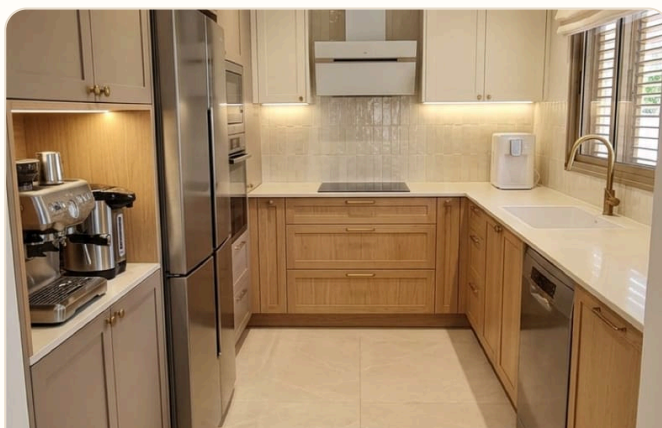

- Lower** Walnut veneer
- Upper + tall** SW 6141 Softer Tan
- Backsplash** Travertine-look porcelain
- Handles** Champagne bronze

3 · Calm Taupe

One soft taupe on every cabinet. Very calm, very clean.

- All cabinets** SW 9173 Shiitake
- Counter** Warm-white quartz, beige-gold veins
- Handles** Brushed brass
- Walls** SW 7012 Creamy

4 · Oak, Taupe & Cream

Light oak below, cream above, a taupe tall wall and shiny cream tiles.

- Lower** Light natural oak
- Upper** BM OC-45 Swiss Coffee
- Tall wall** SW 7038 Tony Taupe
- Backsplash** Cream zellige tiles

Pictures made with AI from your own photos. They show the mood, the colors and the layout — not exact building details.

Smart inside, beautiful outside

You said the most important thing is cabinets that are practical inside. The rule is simple: **drawers, not doors**, in every low cabinet. A drawer brings everything to you.

Inside the cabinets

- ✓ **Pot drawers** under the cooktop, with pegs that hold the lids.
- ✓ **Cutlery tray** in oak, then a drawer for spices.
- ✓ **Swing-out corner** shelves — nothing gets lost in the corner.
- ✓ **Pantry** with 5 pull-out baskets — see every jar at once.
- ✓ **Under the sink:** 3 recycling bins + a cleaning tray.
- ✓ **Bottle pull-out** next to the cooktop for oil and sauces.
- ✓ **Soft-close runners** (Blum, Hettich or Grass). Ask for the brand in writing.

The stone (counter + wall behind)

- ✓ **Warm-white quartz with beige-gold veins** — our pick for ideas 1 and 3.
- ✓ **Cream quartz with taupe veins** — softer, for ideas 2 and 4.
- ✓ Choose **matte (honed)**: it hides crumbs and fingerprints.
- ✓ One slab up the wall = **no grout lines** to scrub.

- ☐ **Our pick**
Warm-white quartz, beige-gold veins
- ☐ **Softer**
Cream quartz, taupe veins
- ☐ **For an island**
Taj Mahal-look quartzite

Light + window

- ✓ **8 small ceiling spots** (450 lumens each), on a dimmer, 3000–3500 K. [Our lighting calculator](#) says ~3,150 lumens for this kitchen.
- ✓ **LED strip under the upper cabinets** — the light you cook by.
- ✓ **Cream linen Roman shade** instead of the lace curtain.

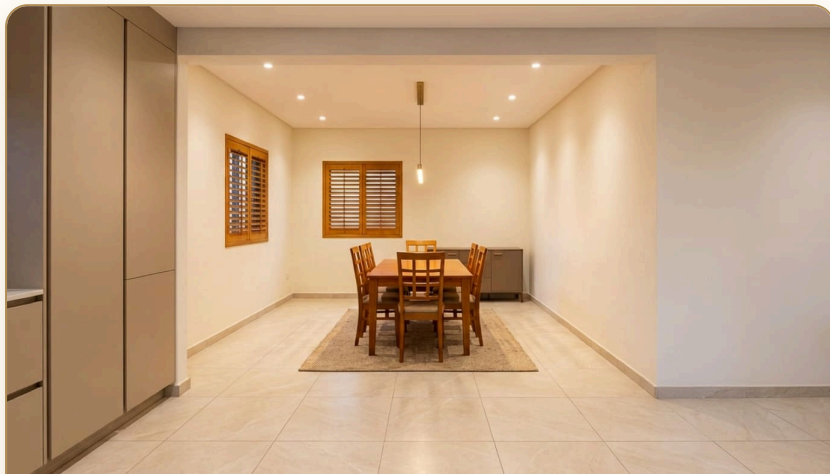

Before — from today's kitchen entrance

After — Plan A, idea 1: tall wall on the left, cooktop ahead, sink under the window on the right.

Where does your table go?

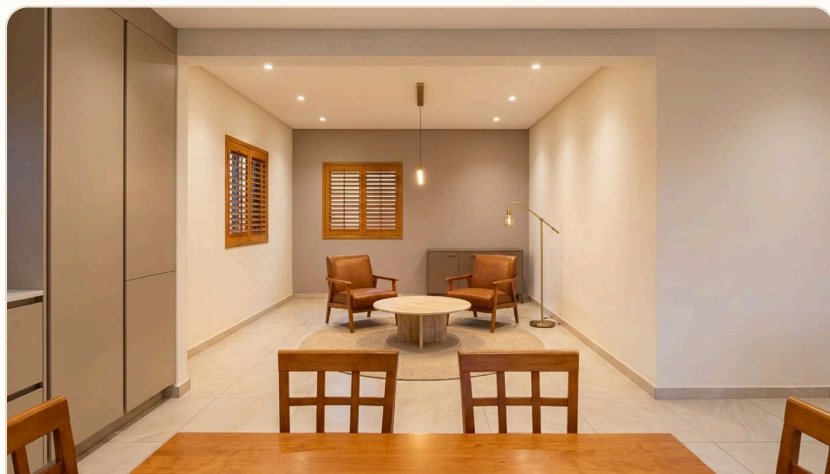

Your table stays — we love it too. The new room is long (about 21') and not very deep (9'2"). Here are four ways to use it.

Idea 1 · The table moves into the light ★ Our pick

Your table moves to the old bedroom, near its window. The rest stays open — lots of space, like you like.

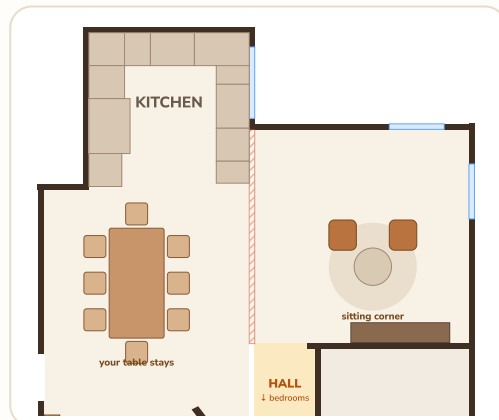

- A long brass pendant over the table
- A low mocha sideboard (closed doors)
- A slim console + mirror by the front door

Idea 2 · Table stays, plus a cozy corner

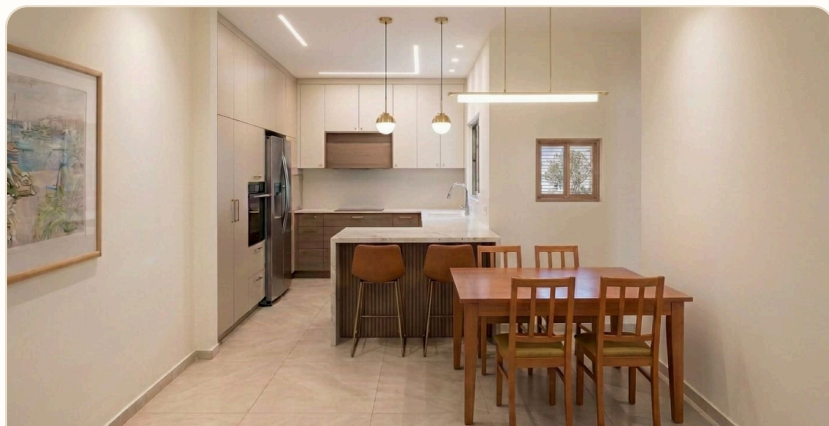

Your table stays where it is today. The old bedroom becomes a sitting corner for coffee and guests.

- 2 cognac armchairs + a round travertine table
- A floor lamp and a soft round rug
- A taupe accent wall

Pictures made with AI from your own photos. They show the mood, the colors and the layout — not exact building details.

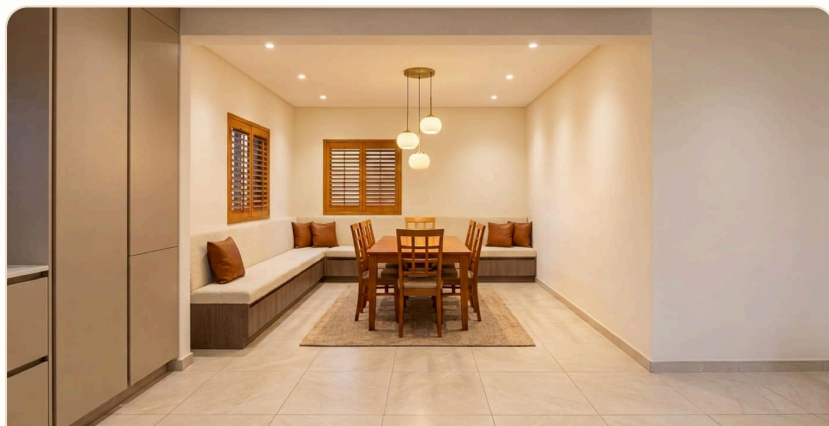

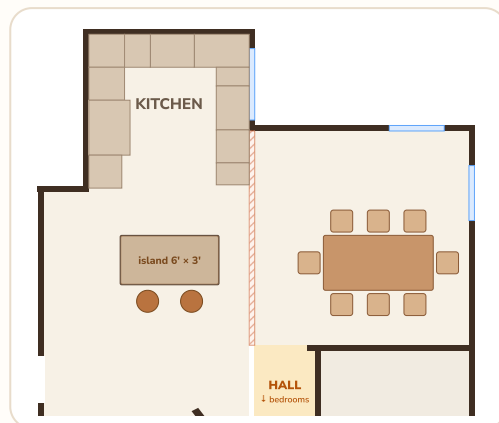

An island? A bench? Here's the truth

Idea 3 · A slim island with a special top

A 6' × 3' (72 × 36 in) island in front of the kitchen, with a thick Taj Mahal-look stone that runs down both ends, a fluted mocha base and 2 cognac stools. Your table goes to the old bedroom.

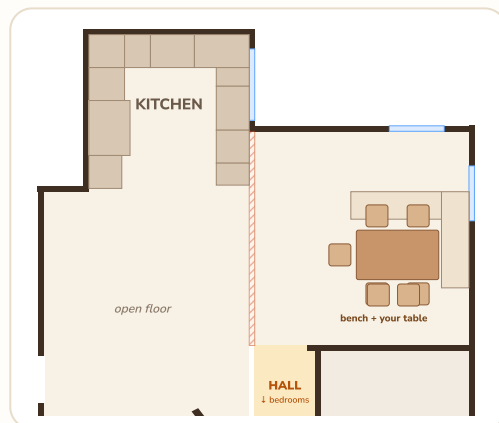

- Island top**
Taj Mahal-look quartzite
- Fluted base**
Mocha oak veneer
- Stools**
Cognac faux leather

Idea 4 · A cozy bench under the windows

A built-in L-bench in the corner of the old bedroom, under both its windows, with your table in front of it. Fits more people, uses less floor.

- Cream bouclé seat, mocha wood base
- 3 glass globe pendants

Can an island fit? Yes — but only a slim one

An island needs about **3'3½"** of **free floor on each side** to walk and open drawers ([our island calculator](#)). In front of the kitchen that leaves room for a **6' × 3'** island with 2 stools — and then the table must move to the old bedroom. If you love open space most, choose Idea 1. Island pendants: 2 small lamps, bottom 30–36" above the top.

Colors, lamps and curtains for the open room

Wall colors

Cream on most walls, so the kitchen, dining and living room flow together. One warm taupe wall makes the dining corner special.

☐ **Most walls**
SW 7012 Creamy

☐ **One accent wall**
SW 7038 Tony Taupe

☐ **Softer option**
SW 9109 Natural Linen

☐ **Warmer option**
BM HC-81 Manchester Tan

Lamps

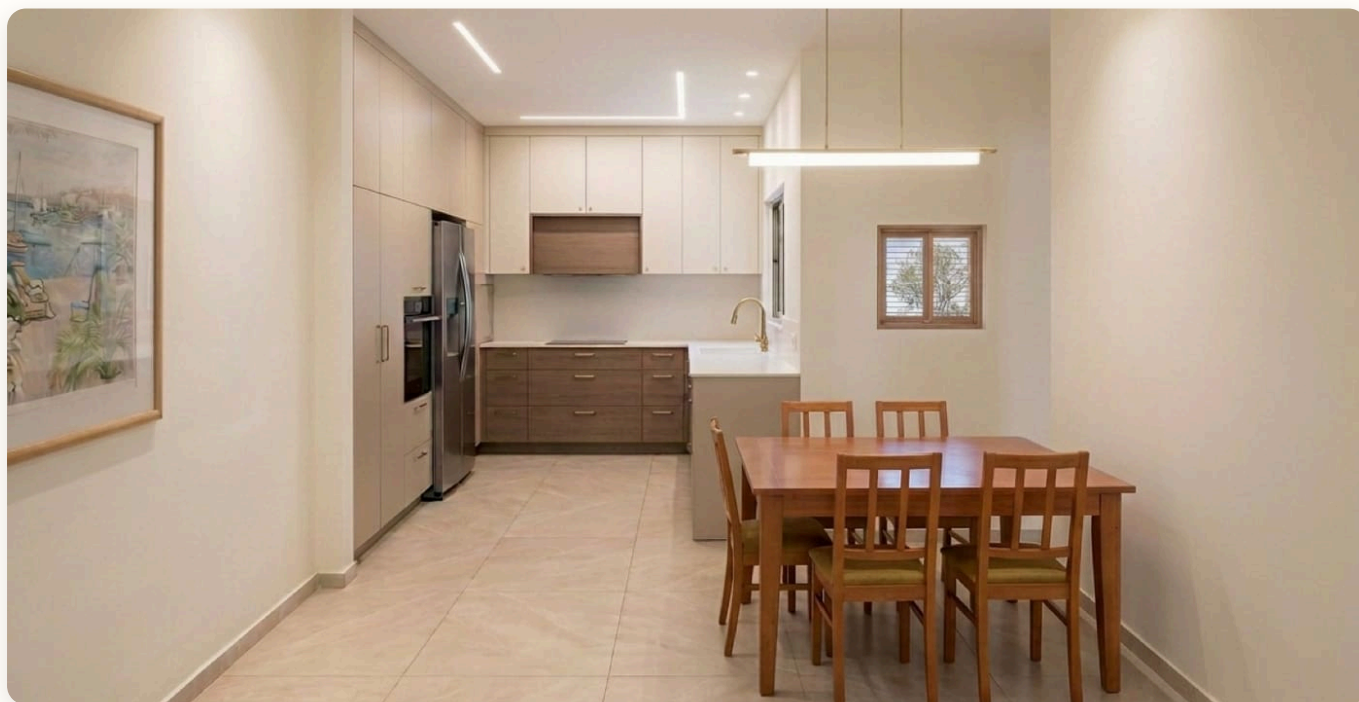

- ✓ **Over the table:** a long linear pendant about **47"** ($\frac{2}{3}$ of your table), or a round one 19½–25½". Bottom **31½–37½"** above the table. ([our chandelier calculator](#))
- ✓ **Ceiling:** about **12 small spots** (450 lumens each) on a dimmer, warm 2700–3000 K. Together with the pendant ≈ 6,750 lumens for 194 sq ft.
- ✓ All on **dimmers:** bright for cleaning, soft for dinner.

Curtains

- ✓ The old bedroom's window: a **cream linen Roman shade** inside the frame — neat, never in the way of chairs.
- ✓ No heavy curtains here: the room stays light and open.

Your table + floor

- ✓ The room is 9'2" deep: your table (about 6'6½" × 3'3½") leaves **about 35½"** behind each chair — enough to sit, not to walk behind. Walk around the ends.
- ✓ The old bedroom has a **wood floor:** it changes to the same cream 32 × 32 in tiles, so it is one floor.

The whole open room in idea 1: Plan A kitchen ahead, the new dining corner on the right.

Where does the TV go?

Two good answers. Both hide the glass shelves with ornaments — you said they take space and collect dust.

Idea 1 · The TV stays — a calm wood wall

★ Our pick

Close the niche with warm mocha wood slats from floor to ceiling. The TV hangs where it is now. The hole under it (5'3" × 3'11½") disappears behind the slats.

- A floating low cabinet with closed doors
- A soft LED light washing the wood
- TV 65–75" (9'10" from the sofa)

Idea 2 · The TV moves — a fireplace wall

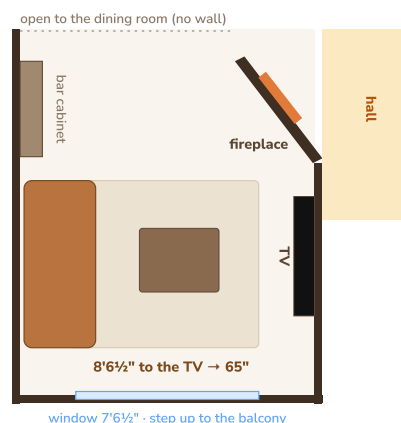

The TV moves to the painting wall (on the right, outside this picture). The old niche becomes an electric fireplace with a closed cabinet below — that fills the 5'3" × 3'11½" hole. The passage to the hall stays open beside it; the spare bedroom's old door at its end is closed with plain wall.

- The sofa goes on the lamp wall
- TV 65" (8'6½" from the sofa)
- The seascape painting moves

TV size and height

From the sofa to the TV is about 9'10" in idea 1 and 8'6½" in idea 2. [Our TV calculator](#) says **65–75"** for idea 1 and **65"** for idea 2, with the **middle of the screen about 42" from the floor** — your eyes when you sit.

The plan on the right is idea 2: the TV on the painting wall, the sofa on the lamp wall.

Pictures made with AI from your own photos. They show the mood, the colors and the layout — not exact building details.

A cognac sofa your dog can't ruin

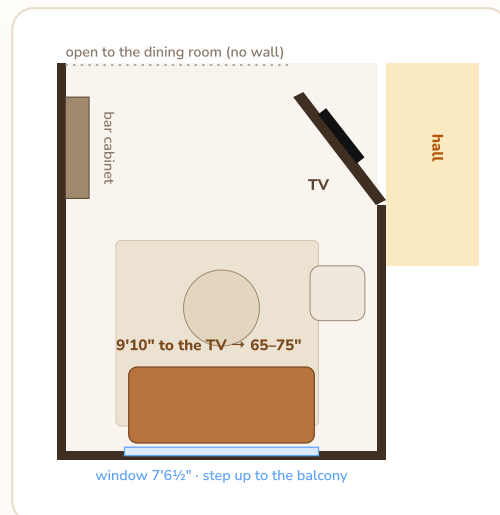

Faux leather wipes clean and dog hair does not stick to it. Cognac brown is warm, classic and young at the same time.

Idea 1 · The room: sofa by the window ★ Our pick

A 3-seat cognac sofa in front of the window, facing the TV. One cream bouclé armchair, a round travertine table, a soft sand rug.

- Sofa**
Cognac faux leather
- Armchair**
Cream bouclé
- Coffee table**
Travertine-look porcelain
- Walls**
SW 7012 Creamy

Idea 3 · The big corner sofa

An L-shaped cognac sofa in the window corner. Room for the whole family.

- Sofa**
Cognac faux leather
- Drum table**
Walnut veneer
- Walls**
BM HC-81 Manchester Tan

Idea 4 · The taupe feature wall

The sofa wall in warm taupe, new brass lamps with linen shades, one big calm painting.

- Sofa wall**
SW 7038 Tony Taupe
- Sofa**
Cognac faux leather
- Wall lamps**
Brushed brass

Also in the living room

- ✓ **The aquarium wall:** take down the old wall lamp and the picture, like you said. Let the aquarium be the only star.
- ✓ **The bar cabinet:** new plain mocha-wood doors, no frosted glass — it stops looking like a display cabinet.
- ✓ **Few pieces:** one sofa, one armchair, one table, one rug. Open floor everywhere else.

Guest bathroom: goodbye tub, hello shower

The bathtub goes. A **3'3½" walk-in shower** takes its place, with a glass panel and no step. A **60" mocha vanity with a white top** — and **two different walls**, like you asked.

1 · Travertine & mocha ★ Our pick

Shower wall in big travertine-look tiles; vanity wall in mocha ribbed tiles.

- Shower wall**
Travertine-look porcelain
- Vanity wall**
Mocha oak veneer
- Taps**
Brushed brass

2 · Shiny cream & walnut

Glossy cream tiles in the shower; a smooth mocha plaster wall; walnut vanity, arched mirror.

- Shower wall**
Cream zellige tiles
- Vanity wall**
BM HC-77 Alexandria Beige
- Vanity**
Walnut veneer

3 · Classic two-tone

Cream marble look in the shower; brown tiles halfway up the other walls, cream above.

- Shower wall**
Crema marfil-look porcelain
- Lower walls**
Mocha oak veneer
- Taps**
Brushed brass

4 · Deep stone & soft waves

A rich mocha stone wall in the shower; a cream wavy-tile wall behind the mirror.

- Shower wall**
Mocha stone-look porcelain
- Wave wall**
Cream zellige tiles
- Taps**
Champagne bronze

Pictures made with AI from your own photos. They show the mood, the colors and the layout — not exact building details.

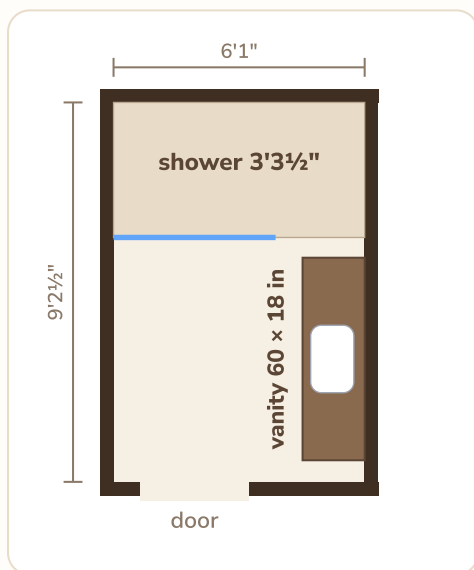

Our pick, up close

Before — the vanity wall

After (idea 1) — a floating 60 × 18 in mocha vanity, white quartz top, one wide basin, a brass-framed mirror with a light on each side, mocha ribbed tiles behind.

What goes in

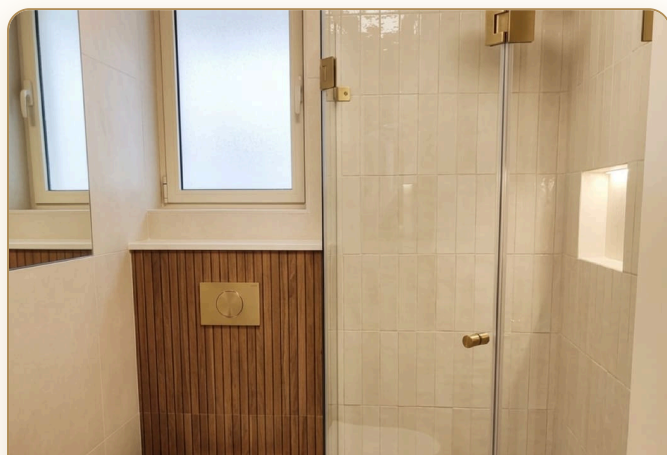

- ✓ **Shower:** 3'3½" deep across the old tub wall, one fixed glass panel, rain shower + hand shower, a lit niche for bottles, no step (a slim drain in the floor).
- ✓ **Vanity:** 60 × 18 in, mocha wood, white quartz top, 2 wide drawers.
- ✓ **Two different walls:** stone-look tiles in the shower, ribbed mocha behind the vanity. The other walls stay calm cream.
- ✓ **Floor:** big cream stone-look tiles; the same tile runs into the shower.
- ✓ **The second door** (to the storage room and the laundry) stays where it is.

Light + fresh air

- ✓ About **4,200 lumens:** 6 waterproof spots + the mirror lights, warm 3000 K.
- ✓ Mirror lights at **eye level, about 65"** from the floor.
- ✓ A quiet fan, about **100 CFM** ([our fan calculator](#)).

Owners' bathroom: small room, big comfort

Same size, same places — everything new. A **32 × 32 in glass shower**, a **28½" brown cabinet with a white top**, a cream floor with little brown flecks, and a new look for the walls and the window.

1 · Walnut & shiny cream ★ Our pick

Walnut-look slats behind the toilet, glossy cream tiles in the shower. Different from the guest bath.

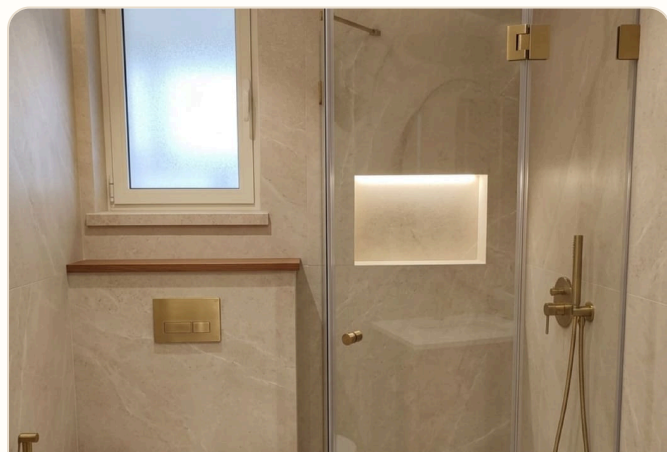

- Toilet wall**
Walnut veneer
- Shower**
Cream zellige tiles
- Floor**
Cream terrazzo, brown flecks

2 · Mocha ribbed wall

One mocha ribbed wall around the window, sand stone in the shower.

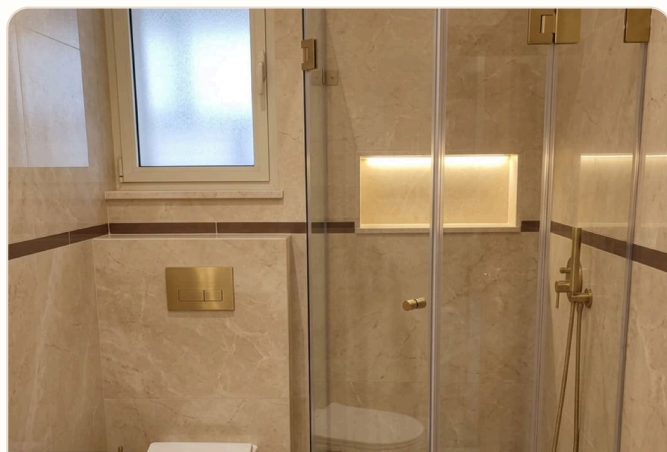

- Feature wall**
Mocha oak veneer
- Shower**
Sand stone-look porcelain
- Taps**
Champagne bronze

3 · One calm stone

The same sand stone on every wall, like a small spa. A wood shelf under the window.

- All walls**
Sand stone-look porcelain
- Shelf**
Walnut veneer
- Taps**
Brushed brass

4 · Classic cream marble

Cream marble look with a thin brown line around the room, brown mosaic in the shower.

- Walls**
Crema marfil-look porcelain
- Border + mosaic**
Mocha oak veneer
- Taps**
Brushed brass

Pictures made with AI from your own photos. They show the mood, the colors and the layout — not exact building details.

Our pick, up close

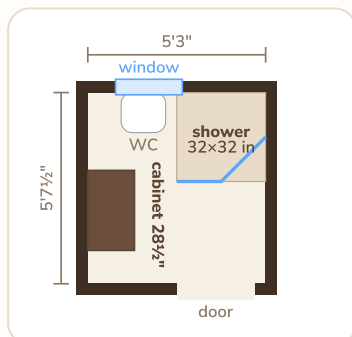

Before

After (idea 1) — frameless glass shower, wall-hung toilet, walnut slats, the window with frosted glass.

The cabinet: $28\frac{1}{2} \times 16\frac{1}{2}$ in, two drawers, white top.

The window, light + more

- ✓ **Window:** a slim warm-white frame, **frosted glass**, a deep tiled sill. No curtain needed.
- ✓ **About 2,200 lumens:** 4 spots + a light in the mirror cabinet, 3000 K.
- ✓ **Wall-hung toilet:** easy to clean under, and the room feels bigger.
- ✓ **Floor:** cream with little brown flecks (terrazzo look) — what you asked for.

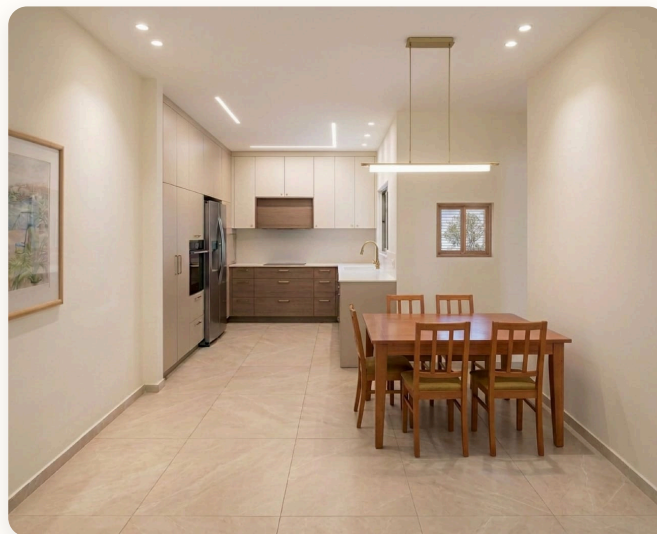

Light, room by room

Lumens = how much light. Kelvin (K) = how warm it looks: 2700–3000 K is cozy, like a sunset. Numbers from our free calculators.

Room	Ceiling	Feature lamps
Kitchen 90 sq ft	8 spots × 450 lm, 3000–3500 K, dimmer	LED strip under the upper cabinets; light over the coffee station
Dining (open room) ≈ 194 sq ft	12 spots × 450 lm, 2700–3000 K, dimmer	Linear pendant ~47" over the table, 31½–37½" above it; 2 small pendants over an island
Living 167 sq ft	6 spots × 450 lm, 2700–3000 K, dimmer	Floor lamp by the sofa; 2 brass + linen wall lamps; soft LED on the TV wall
Hallway (the long one)	Small spots every ~4', 3000 K	A soft night light low on the wall, on a motion sensor
Guest bath	6 waterproof spots, 3000 K	Mirror light or 2 wall lights at ~65"; LED in the shower niche
Owners' bath	4 spots, 3000 K	Mirror-cabinet light; LED in the shower niche

Three rules that make light feel expensive

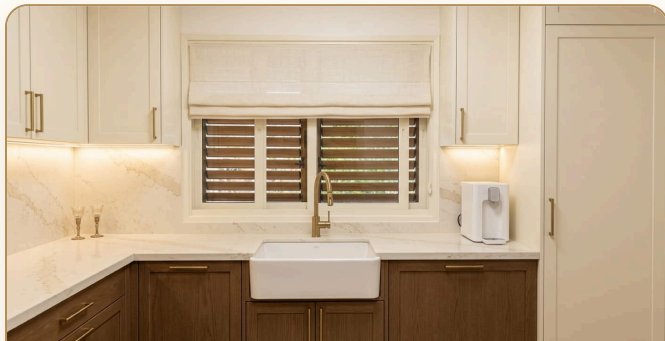

- ✓ **Everything on a dimmer** — bright for cleaning, soft for dinner.
- ✓ **One color of light** in the open room (all 2700–3000 K), so the kitchen, dining and living match.
- ✓ **Light the walls, not just the floor:** wall lamps, the LED on the TV wall and under the cabinets.

Warm spots on dimmers through the whole open room.

Curtains for the kitchen sink window

The window is right above the sink, so whatever you choose must stay **above the tap**, cover the **whole window** and be easy to wash. The wooden shutters outside stay.

1 · Cream linen Roman shade ★ Our pick

Folds up neatly inside the frame and never touches the tap. Calm and classic.

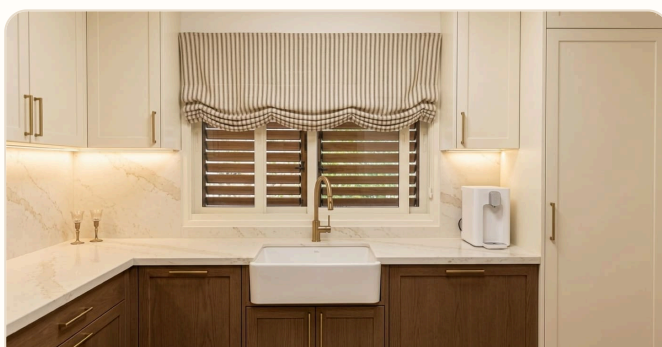

2 · Natural woven shade

Honey jute / bamboo across the whole window — warm texture that matches the mocha wood.

3 · Honey-oak wooden blind

Warm wood slats with cream tapes — tilt them to let light in without being seen.

4 · Striped relaxed Roman

A soft curve in cream-and-mocha stripe linen — a little more character.

5 · Sheer roller shade

Warm-white, light-filtering, a slim brass bar — the simplest and easiest to wipe.

Good to know

- ✓ Mount it **inside the window frame** so nothing hangs over the sink.
- ✓ Choose **washable** fabric (kitchen steam and grease).
- ✓ Every idea covers the **whole window** when it is down.

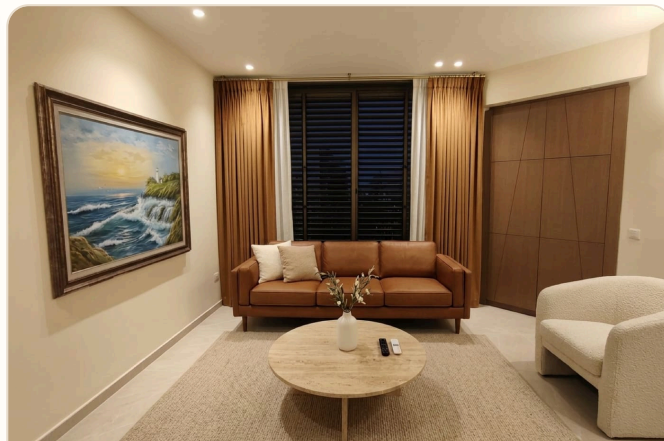

Curtains for the big living room window

The window is 7'6½" wide, with a step of about 3'3½" up to the small balcony. The curtains must open fully to the sides so the step and the balcony stay free.

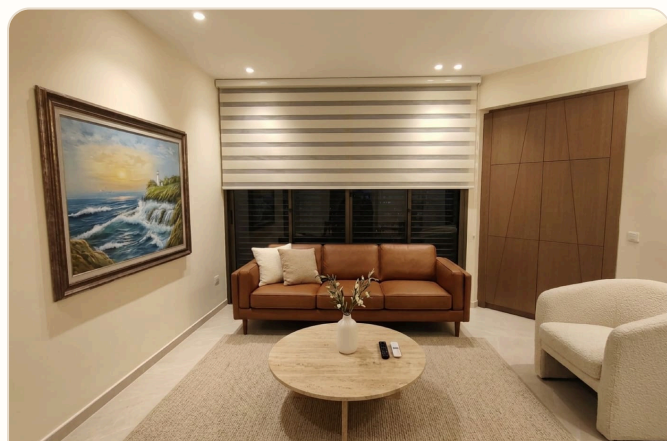

1 · Sheer + linen drapes ★ Our pick

Warm-white sheer for the day, sand-beige drapes for the night and the TV. Ceiling track, wider than the window.

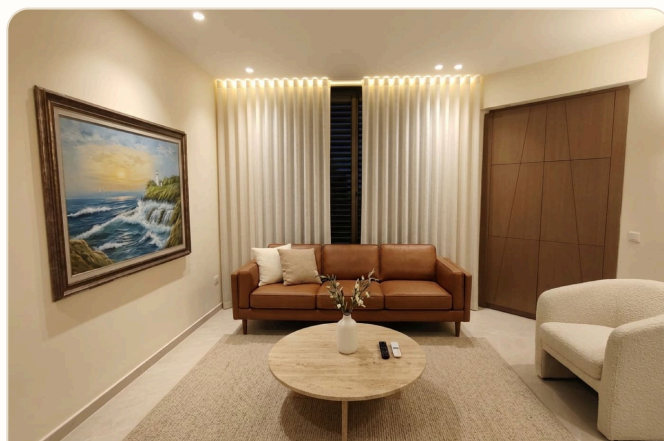

2 · Caramel velvet pinch-pleat

Rich, warm and classic — matches the cognac sofa. Sheer behind.

3 · Day-and-night blind

One wide blind with sheer and solid bands — no fabric on the floor (good with the dog).

4 · Soft wave sheer + hidden light

One long ripple-fold sheer from ceiling to floor, washed by a hidden LED line.

Sizes (from [our curtain calculator](#))

- ✓ Track or rod **just under the ceiling**, about **9'2"** long, so open curtains sit beside the glass.
- ✓ About **4 panels**, each ~55" wide; length to just **kiss the floor**. Measure before buying.

Curtains for the open dining room

The old spare bedroom has **two windows** — one ahead, one on the right. Dress both the same way, so they read as one calm room with the dining table.

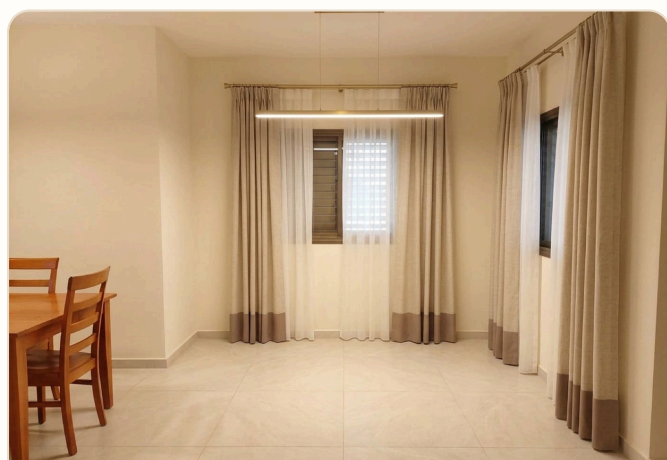

1 · Two Roman shades ★ Our pick

Cream linen inside each frame. Clean, and works with the bench idea (idea 4).

2 · Floor-length sheers

Warm-white linen sheers, hung high and wide — the windows look bigger.

3 · Drapes with a mocha band

Sand linen with a mocha band at the bottom over a sheer — warm and a little formal.

Good to know

- ✓ With the **bench under the windows** (dining idea 4), choose the Roman shades — long curtains would sit on the bench.
- ✓ Keep the wooden louvre shutters outside — they do the dark.
- ✓ Use the **same fabric** as the living room for one look through the whole open room.

Curtains for the bathroom windows

Bathrooms need **moisture-proof** choices: coated fabric or faux-wood (not real wood) slats. Every idea covers the whole window; frosted glass behind adds privacy.

Guest bathroom

Roman shade ★ Our pick

Water-resistant cream fabric.

Faux-wood blind

Honey-oak look, waterproof.

Roller shade

Warm white, moisture-proof.

Owners' bathroom

Cellular shade

★ Our pick

Soft honeycomb, top-down.

Roman shade

Water-resistant cream linen look.

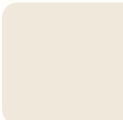

Faux-wood blind

Walnut look, waterproof.

The shopping list for colors

Show this page at the paint shop and the tile shop. Always paint a big sample (about 20 × 20 in) and look at it in the morning and in the evening.

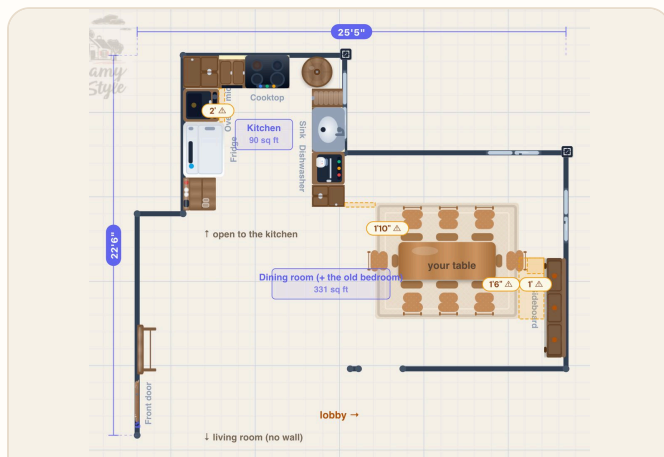

Where	Color / material	Code
Walls: kitchen, dining, living	Creamy warm cream	SW 7012
One accent wall (dining or sofa wall)	Tony Taupe warm taupe	SW 7038
Softer / warmer wall options	Natural Linen · Manchester Tan	SW 9109 · BM HC-81
Kitchen idea 1	Mocha oak veneer + Creamy uppers + warm-white quartz	SW 7012
Kitchen idea 2	Walnut veneer + Softer Tan + travertine-look tiles	SW 6141
Kitchen idea 3	Shiitake on every cabinet	SW 9173
Kitchen idea 4	Light oak + Swiss Coffee + Tony Taupe tall wall	BM OC-45 · SW 7038
Floor (kitchen, dining, living)	32 × 32 in matte cream porcelain, light beige lines, laid straight, cream grout	your tile
Bathroom floors	Cream with small brown flecks (terrazzo look) or cream stone look	—
Metal everywhere	Brushed brass (or champagne bronze) — handles, taps, lamps	—
Sofa	Cognac faux leather, wipe-clean	—

										
Creamy	Natural Linen	Manchester Tan	Softer Tan	Shiitake	Tony Taupe	Alexandria Beige	Mocha oak	Walnut	Cognac	Brass

SW = Sherwin-Williams, BM = Benjamin Moore. Any good paint shop can mix these from the code. Colors on paper and screens are never exact. Find more: [beige](#), [taupe](#) and [cream](#) paint finders.

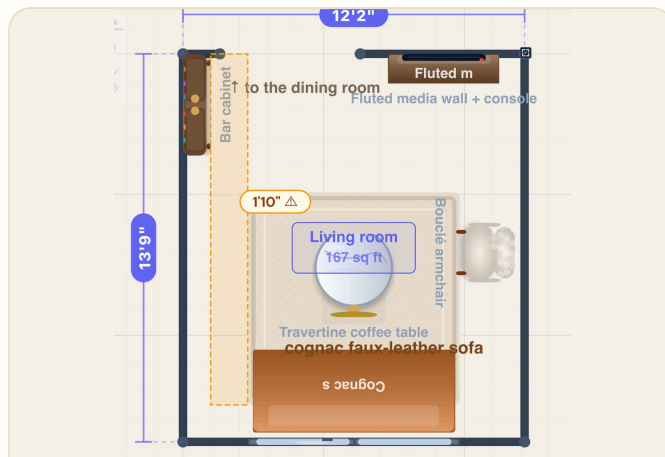

Every room in the free 2D planner

Scan a code with your phone. You can move any piece, try another idea, press **3D Render**, and send it to the kitchen maker or the builder. It opens in feet and inches.

Before the builder starts

A short list that saves money and stress. Do these in this order.

1 • Ask and check

- ! **An engineer** checks **both walls** that come down (wall R and the wooden wall behind the fridge). If one carries weight, it gets a beam — the plan still works.
- ! **The air conditioner** on the spare bedroom's wall must move to another wall.
- ! The **switches and outlets** on that wall move too.
- ! **The spare bedroom's old door** to the hall is closed with wall — the room is reached from the dining room now.
- ! The spare bedroom has a **wood floor** — it changes to the cream tiles.

2 • Measure again

- ✓ Kitchen opening **8'7½" + 1'3½" = 9'11"**, but the back wall is 9'7". One is about 4" off.
- ✓ The window wall: is the short part **1'3½" or 2'3"**?
- ✓ The fridge depth (a side-by-side is about **28½"** deep, not 16½").
- ✓ Exactly where the **wooden wall behind the fridge** starts and ends.
- ✓ Your table: length × width.
- ✓ The ceiling height (for the tall cabinets and the curtains).

3 • The order of work

- 1 Engineer's OK → take the walls down
- 2 Electrician + plumber (outlets, the timer outlet, water for the sink, dishwasher and the filtered-water dispenser, the AC)
- 3 One new floor through kitchen, dining and the old bedroom
- 4 Bathrooms (they need the most time)
- 5 Kitchen cabinets — **buy the appliances first**, so every niche fits
- 6 Paint (big samples first!)
- 7 Lamps, curtains, then the furniture

What to send us next

- ✓ Your favorite idea in each room (just the number)
- ✓ The new measurements above
- ✓ Anything you want changed — we make a new version fast

A home is not a project, it is where the family meets. Enjoy every step. — Dreamy Home Style
